PROFILE

Computing Systems student at Ulster University (predicted First Class) building full-stack, AI-integrated products — an AR/AP agent with tiered LLM autonomy (FastAPI + React) and a Telegram fitness assistant wired to Claude and Supabase. Comfortable across the stack: backend APIs, frontend UI, and the model integration in between. Seeking a Software Engineer or AI/ML role to build production systems end-to-end.

TECHNICAL SKILLS

Languages & Frameworks: Python (FastAPI, Pandas) | TypeScript/JavaScript (React, Vite, Node) | SQL (MySQL) | R

AI/ML & Integration: LLM/agent integration (Claude tool use, prompt design, guardrails) | autonomy-tier system design | ML fundamentals (scikit-learn/PyTorch, per coursework)

Infrastructure: Docker | Supabase/Postgres | OAuth | WebSockets | Git

EDUCATION

Ulster University — B.Sc. Computing Systems **Sep 2024 – May 2027**
London, England | Predicted Classification: First Class

Key Modules: Machine Learning, Algorithms, Software Engineering, Databases, Statistics

PROJECTS

Finoks — AR/AP Agent | Python · FastAPI · React · WebSockets · SQLite · Claude

- Built an autonomous invoicing agent for UK SMEs with AML-aware screening and statutory interest logic, exposed via a FastAPI backend and real-time React UI
- Designed a three-tier autonomy model (AUTO / ESCALATE / HARD_BLOCK) so the LLM acts within guardrails instead of freely automating financial decisions
- Shipped a live end-to-end demo: ingestion → agent reasoning → UI feedback loop

Telegram Fitness Assistant | TypeScript · Supabase · Claude · Strava/Garmin OAuth · Docker

- Built a production-shaped bot integrating Claude for workout Q&A grounded in real activity data
- Implemented encrypted credential storage, Supabase migrations, and a Dockerized deploy pipeline
- Designed provider-connect commands and webhook handling for real-time interactions

WORK EXPERIENCE

Floor Staff — Aqua Shard, London **June 2025 – Present**
Part-time (20 hrs/week) alongside full-time academic study

- Delivering high-standard service in one of London's most prestigious fine dining venues, maintaining a First Class academic average concurrently
- Developed composure under pressure, precision, and professional communication within a high-expectation team environment

AWARDS & ACHIEVEMENTS

Dean's List Award — Recognised for academic excellence by Ulster University (2024–2025)
