PROFILE

Final-year BSc Computing Systems student at Ulster University London (predicted First Class, graduating May 2027), building AI-native backends: APIs and agents with Python, FastAPI and the Claude API, packaged with Docker. I treat the LLM as one guarded component of the system, not the whole product. Open to graduate and junior backend roles from June 2027, and part-time roles now.

TECHNICAL SKILLS

Languages	Python, TypeScript, SQL, R
Backend	FastAPI, Flask, Node.js, REST APIs, WebSockets, JWT & bcrypt auth, OAuth2, pytest
Databases	PostgreSQL (Supabase), MongoDB, SQLite, MySQL
AI	Claude API, tool use & agent loops, prompt design & guardrails, Claude Code
DevOps & tools	Docker, Render, Git & GitHub, Jupyter & Pandas, Power BI

PROJECTS

FinOps Agent | FastAPI · Claude API · JWT · bcrypt · WebSockets — Cursor Hack London · Apr 2026

- Autonomous accounts-receivable agent for UK SMEs: chases overdue invoices, screens counterparties for AML risk and applies UK Late Payment Act statutory interest.
- Designed a three-tier autonomy gate (AUTO / ESCALATE / HARD_BLOCK) so the LLM acts on its own only where it is safe to, and escalates or is blocked otherwise.
- Claude drafts chaser emails with template fallbacks; the agent's activity streams live to a React UI over WebSockets behind JWT + bcrypt auth.

FitFlow | Claude API · Supabase · Strava OAuth2 · Docker · Render

- AI fitness-coaching Telegram bot: syncs Strava activities through OAuth2 into Supabase and answers free-text questions with Claude, using recent training as context.
- Encrypted credential storage, Supabase migrations and webhook handling; Dockerised and deployed on Render.

London Blue Plaques Explorer | Python · Flask · MongoDB — In progress

- Flask + MongoDB REST API over Open Plaques data with nested documents; building search, filter and aggregation endpoints (counts and averages per area and category).

EXPERIENCE

Student Representative | Ulster University London — Sep 2024 – Present

- Represent my cohort in staff–student meetings, gathering course feedback and following up on agreed changes.

EDUCATION

Ulster University London | BSc Computing Systems — Sep 2024 – May 2027

Predicted classification: First Class · Dean's List for academic excellence (2024–2025)

Key modules: Databases, Statistics, Machine Learning, Algorithms, Software Engineering

CERTIFICATIONS

Anthropic · Claude Code 101 (Jun 2026)

DataCamp · Python Data Fundamentals · Applying SQL to Real-World Problems · Analyzing and Visualizing Data with Power BI

LANGUAGES

Uzbek (native) · Russian (fluent) · English (C1)
